

Department for Communities NI – CPP APPG Inquiry 1 – 21st Century Places – values and benefits
Response

It might be helpful to the Group to be aware of the work the NI Historic Stakeholder Group has been doing since its formation in 2016. The Group has been developing clear statements – with examples and data – of the economic and social value that is generated by the historic environment, not least in terms of support for the Programme for Government, Further information is available at <https://niheritagedelivers.org/>. I would particularly draw attention to the Heritage Delivers document itself, Heritage Statistics 2019 <https://niheritagedelivers.org/publications/ni-heritage-statistics-as-recorded-on-31-march-2019>; and key partners involved in the work <https://niheritagedelivers.org/partners>

the work and publications include a wide range of case studies that we believe will be of interest and value to the work of the APPG
